

Selected Work

Conceived and deployed tailored, lightweight CFML engines—spanning custom CMS, CRM, Intranet, and Extranet platforms. Built with a core focus on custom permissions, high performance, and backend simplicity. Below are some of the most notable projects.

Period	Visual	Project & Company	Company	Description
2006 – Ongoing		live & work CRM	Live&Work	Suivi.pro is a full-featured CRM tailored to relationship/network marketing, offering an administrable back-office with multiple views (status, archives, map, custom), integrated search, personalized team websites, and document sharing. Sales tools include order management, PayPal integration, multi-template email campaigns (Mandrill, Gmail), Google Calendar-linked appointment scheduling, inter-distributor lead transfer, automated envelope printing, and itinerary generation. Team-development features add recruitment microsites, organizational tree visualization, geo-located testimonial generation for campaigns, and downline access management. A dedicated events module handles team/public event creation, registration-enabled event websites, and invitation systems, while a training module supports multi-level course architectures (PDF, video), sequential access

				control, and automated notifications. Ongoing maintenance of the application and its satellite sites is provided throughout.
2019 – 2021		Masculin.com	<i>Big Manitou</i>	Complete technical acquisition and overhaul of a high-traffic digital media portal. Designed and executed custom database conversion scripts to migrate historical content from a legacy PHP architecture over to WordPress. Managed ad network integrations and brand content deployment.
2005 – 2006		HelpMe	<i>Reed Midem</i>	Specification and development of "HelpMe", an internal corporate HelpDesk and ticket-tracking application built with CFML. Designed to streamline internal support requests and IT issue tracking across departments, with Microsoft Active Directory integration for user authentication and department/permission management.
2002 – 2003		France Only	<i>FranceOnly</i>	Full-stack creation of a pioneer bilingual vacation rental marketplace in CFML. Engineered the search engines, booking mechanics, multi-criteria listings catalog, and client administration panels.

Period	Visual	Project & Company	Company	Description
2001 – 2002	 ./img/clients/activeaccess_com_logo.png	ActiveAccess	<i>Imperial College London</i>	Overhaul and ongoing engineering of ActiveAccess, a complex bilingual B2B procurement platform developed in CFML. Integrated automated supplier feeds, multi-currency support, and enterprise workflow rules.
1999 – 2000	 ./img/clients/fishing_co_uk_logo.png	Fishing.co.uk	<i>Highbury House Comm. Plc</i>	Web management and full redesign of a major UK thematic media portal. Managed content workflows on EasyPress (Perl-based CMS), implemented feature extensions, and optimized platform traffic and structure.
